### **Certificate**

I extend my best wishes and greetings to the team of **Just Agriculture Magazine** for coming up with the brilliant idea of launching this magazine. I hope this magazine will provide an excellent platform to share new knowledge and techniques to all the agriculture students, teachers and researchers including progressive farmers not only in India but across the globe. It will include publication of popular and technical articles, success stories and short communications to enhance the knowledge to alleviate manifold agricultural production. Besides the agriculture students, faculty and researchers, this magazine would be very helpful for all the progressive farmers and entrepreneurs who are engaged in agricultural and allied activities.

As an agriculture researcher and teacher, I felt strong need of such a magazine and all the same I am sure that this magazine will certainly perform the best role as per its name "**Just Agriculture**", this reminds me about the famous quote of **Norman E Borlaug** that "**Everything else can wait, agriculture can't**".

I appreciate all the efforts of the Editors of **Just Agriculture Magazine** who are working relentlessly for the welfare of farmers and associated workers to mitigate the food problem over the globe in coming years, when population is at increase while agricultural land area and natural resources are shrinking, may be the main constraint for agriculture productivity in 21<sup>st</sup> Century.

(D.N.Bharadwaj)

Ex-Professor & Head (Genetics & Plant breeding)

C.S.Azad University of Agri. & Tech., Kanpur-208002.

Visiting Professor of Plant Sciences, UNDP (Ethiopia) East Africa,
