MISSION & VISION OF THE COMPANY

The Vision is to work towards increasing shelf life & cut wastage/losses at various stages from farm to the market for fruits, Vegetables & Flowers. In developing countries, it has been estimated more than 30% of the produce loses its commercial value due to improper handling methods, inadequate temperature-controlled storage facilities and improper logistics and distribution systems adopted before it reaches the market, so our vision is to value add in this space. In the next five years our vision is to partner more innovative global technologies in post-harvest & connect with the FPO segment & the government projects in India for better post-harvest management of horticulture produce.
