### Introduction

Smart farmers made by adopting modern agriculture smart Agriculture Equipment, increasing income most farmers in India do farming through traditional methods. Due to which they get less crop production. As a result, their income starts declining. At the same time, the farmer increases his crop production by farming with the help of modern resources and automatic farming equipment. This gives him a good profit which increases his income. Uses of this Agriculture Equipment will increase farmer production and profits Today, the farmers who are doing smart farming are making good profits by using new farming tools made with modern technology, which is increasing their income.

### Agricultural equipment used for farming

#### 1. Two stroke and four stroke sprayer pump (Agricultural Sprayer)

Agricultural sprayers used in agricultural work are available in 2 and 4 stroke spray pumps in the market. These have been launched in the market with some features. With this help, the farmer can easily spray insecticides on crops in his fields. Apart from this, they can also be used for the cleanliness of the environment. Talking about the price of 2 & 4 Stroke power supply sprayer, it is available in an affordable price range at Rs. 9,000 – Rs. 22,000. The price of 2 & 4 Stroke Sprayer Pump is very convenient and budget-friendly, also very easy to buy. 2 & 4 Stroke spray pumps, both come in high quality, but 4 stroke spray pumps have twice the capacity than 2 stroke spray pumps. Now let's talk about 4 stroke spray pumps, these are high capacity pumps which have twice the capacity of 2 stroke spray pumps. Rajsan – 89-1000, 4 stroke power supply spar is now available in the market for Rs 11,500 instead of 11,000, and Sparman-1000 power supply spar 12,000 for Rs 11,500. Thus,

the prices of both these 2 and 4 stroke spray pumps (agricultural sprayers) have been reduced significantly, which the farmers can avail.
