Value added products are raw agricultural products that have been modified or enhanced to have a higher market value and/or a longer shelf life. Millets are traditional grains, grown and eaten in the Indian subcontinent for at least the past 5000 years. They are rain-fed, hardy grains which have low requirements of water and fertility when compared to other popular cereals. In India there are lots of value added products of millets and they are listed below.

Slurrp Farm

Slurrp farm offers millet in unique ways. The brand knows only some people love millet in its original form. So to make everyone fall in love with this whole grain, it brings a good range of millet products.
